

INTELLIGENT MONITORING SYSTEM

BE AWARE OF ALL VEHICLE & PEDESTRIAN ACTIVITY IN REAL TIME!

LocoMobi World's Licence Plate Recognition (LPR) is a fully scalable solution with a combination of innovative hardware and software products. **Introducing the industry's first true tailgating solution that detects, alerts, and identifies violators: The Added Awareness Console & Advanced Alerts.** The front desk console allows you to further monitor your property via a live video stream from the CondoPark system LPR cameras, augmented with the real-time status of all licence plate scans. The front desk is also notified when any vehicles are denied access, which allows them to take necessary action immediately. The **Awareness Advanced Alerts** uses an artificially intelligent engine to push real-time alerts to front desk personnel of all unauthorized and unusual behaviour at the garage doors such as vehicle tailgating and trespassing pedestrians. Property managers have the ability to customize and configure the alerts that best suit their needs of security, and give them peace of mind!

HIGHLIGHTS

-  **Real-time alerts:** Alerts are shown in the console in situations such as identifying unauthorized vehicles tailgating in, pedestrians trespassing through the garage, when drivers go over the property speed limit, and many more!
-  **Convenience & enhanced security:** Enables the front desk to monitor all vehicle behaviour, communicate in real time with residents, and if necessary, open the garage door manually via the console.
-  **System health & live support:** LocoMobi World support is automatically notified when the system detects abnormal patterns of vehicles being granted access manually.
-  **Reports:** Full audit reports with images that show each vehicle's method of entry ie. granted access via LPR, manual entry, or unauthorized access/tailgating.
