

RFID ACCESS READER AND TAGS

GENERAL INFORMATION

LocoMobi World's Radio Frequency Identification (RFID) system offers advanced parking technology that allows the user a streamlined experience, enhanced security, and control with increased compliance in parking and building access. The system is compatible with a wide range of LocoMobi World RFID tags such as anti-metal tags, EV/FV standard cards, paper labels and more!

HIGHLIGHTS:

- Option for short range proximity cards for customers requiring access to buildings and parking alike requiring a single solution
- Option for medium range or in-vehicle tag installation - a very attractive solution for users requiring a more permanent fixed installation. Ideal for customers that have fleets of vehicles or if customers want the most efficient experience by driving up in a controlled lane without interaction from an attendant
- Each RFID reader is capable of downloading valid tag numbers in real time from the LocoMobi Cloud, making it possible to sustain localized operation even with communication interruptions from the internet

BENEFITS:

- RFID card reader will work whether online or offline
- Will integrate into any paystation that communicates with cloud server
- Bonus option of including ticket LPR for redundancy
- Compatible with all LocoMobi World tags and access cards

RFID ACCESS READER AND TAGS

TECHNICAL SPECIFICATIONS

CONSTRUCT:

Frequency	Multiple available
Size	450X450X50MM (Size is subject to change)
Voltage	DC-12V±2V
Protocol	ISO-18000-6C (EPC G2) ISO-18000-6B
Interface	Wiegand26
Range:	6-8m
